

Adjuster Licensing with Sircon®

Data Sheet

The easy way to manage your adjuster licenses.

Fully Managed Adjuster Licensing

It's not easy to successfully manage adjuster licenses. And if you're maintaining adjuster licenses alongside producers' credentials, the differences and intricacies of state-specific regulatory rules and processes compound the complexity. Navigating this complex regulatory environment is essential to ensuring adjusters are able to manage claims without any interruption.

Requirements vary by state. Some states don't require adjusters to have a license at all, others offer designated home state status. Do you know which states offer license and continuing education reciprocity? As the landscape continues to shift, the industry knowledge gap increases the risk of non-compliance. Becoming an expert in adjuster licensing is a daunting task, which is why there is Sircon® Licensing and Registration Services (LRS).

Adjuster and Claims Licensing Made Easy

Vertafore's Sircon Licensing and Registration Services (LRS) is the leader in compliance business process outsourcing. With more than 25 years of experience in licensing and compliance administration, our proven expertise and measurable results allow you to focus on your core competencies. From consulting to total outsourcing, the Sircon LRS team is staffed with experienced, knowledgeable individuals dedicated to help ensure your success.

A New Adjuster Experience

Adjusters live with the headache of licensing and compliance every day. Whether they've been in the industry for one or twenty years, remembering regulatory requirements is laborious due to the lack of reciprocity between each state. And most importantly, it takes the focus away from servicing customers.

In a competitive market, onboarding new adjusters quickly by giving them clear, consistent information is imperative and gives you an advantage over your competitors.

Sircon LRS support is available to your adjusters whenever they need it, giving personalized services by answering all of their continuing education, licensing, renewal, and state-specific questions.

“We use a lot of vendors and Vertafore has been a great vendor partner—they're very customer oriented in helping us ensure that we're licensing compliant. The LRS team has taken the burden off of us and they really do provide an end to end solution for our licensing needs.”

Glenn Margosian,
*Operations and Claims Executive,
The Hanover Insurance Group*

LRS even schedules periodic reminders to ensure that adjusters know when it's time to renew and what is required for continuing education. Sircon LRS can work directly with your adjusters to manage processes based on your unique needs.

As an added benefit, Sircon LRS can pay the regulatory fees and send you a consolidated monthly invoice. This eliminates the need for your adjusters to front the costs and apply for reimbursement.

Why You Should Partner with Sircon LRS

Improve adjuster experience—Reliable and consistent communication with one toll-free number and email service box

Reduce operational cost, increase efficiency—LRS services provide scalability, flexibility and automation

Mitigate compliance risks—LRS' established best practices and quality control reduces risk of market conduct inaccuracies, fines, and risk to reputation

State of the art compliance management technology—Maintained by a dedicated team ensuring secure and trusted information

Expedite billing—Pay one monthly invoice for all compliance regulatory fees and eliminate the need for adjuster expense reimbursement

Faster, more efficient processing—LRS navigates the best path to meet licensing requirements with the most current rules and regulations in mind

Focus on servicing clients—Access the industry's most knowledgeable experts for all of your compliance needs and questions
